RepoGuard AI

Repository Health Intelligence Report

Repository: **octocat/Hello-World**

Generated: 2026-03-13 15:20 UTC

Confidential engineering assessment for maintainability, resilience, and security planning.

2. Executive Summary

This report summarizes repository quality signals, contributor resilience, technical debt, and security risk.

Health Score	40%
Bus Factor	90%
Technical Debt	240 hours
Security Score	20%

3. Repository Metadata

Full Name	octocat/Hello-World
Description	My first repository on GitHub!
Visibility	public
Stars	3520
Forks	5871
Open Issues	0
Open PRs	911
License	N/A
Last Commit	2012-03-06T23:06:50+00:00

4. Health Score Breakdown

Score: **40**

Confidence: **0.6**

Rationale: The repository has a low number of recent commits, no license, and no information on languages used, which raises concerns about maintainability and security. However, it has a large number of stars, forks, and watchers, indicating a strong community interest.

5. AI Analysis Overview

Dimension	Score	Risk/Notes
Bus Factor	90	low
Technical Debt	240	high
Security	20	critical
Maintainability	20	See hotspots
Documentation	0	See gaps

Spaceghost	1
octocat	1
Cameron423698	1

8. Security Review

Security Score: **20**

Risk Level: **critical**

Critical Findings:

- No recent commits in the last 12 weeks
- No license specified
- Low contributor resilience with only 3 contributors

9. Technical Debt Summary

Estimated Debt: **240 hours**

Debt Level: **high**

- outdated dependencies
- unmaintained codebase
- insufficient testing

10. Top 25 Refactoring Tickets

#	Title	Area	Effort(h)	Risk	Impact
1	Update License	Legal and Compliance	4	8	9
2	Address Open Pull Requests	Community and Maintenance	120	7	8
3	Refresh Project Description	Documentation and Communication	2	2	6
4	Re-engage Contributors	Community and Maintenance	16	5	5
5	Update Repository Languages	Documentation and Communication	1	1	2

11. Repository File Tree

Directory and file structure as fetched from the default branch.

Legend: [DIR] folder, [FILE] file

```
[DIR] Hello-World
`-- [FILE] README
```

12. External API Calls Detected

HTTP/HTTPS endpoints found by static scan of code files (up to 60 files). Provider names are resolved from known hostname patterns.

#	Provider	Method	Hostname	File
—	No external API calls detected
